

Witt

Winter oilseed rape / winter canola listed in Denmark and the EU in 2013.

Breeder: Knold + Top ApS. Representative: Nordic Seed A/S.

Witt [=Top 16] is a double low winter oilseed rape [canola] with white flowers. The variety is open pollinated [an inbred line]. **Plant height:** Medium to high. **Start of flowering:** Medium. **Maturity:** Early to medium. **Resistance to lodging:** Good. **Oil content:** High. **Protein content:** Medium. **Level of glucosinolates:** Low, 13.7 $\mu\text{moles/g}$ seed [mean of 2011 and 2012]. Description: The Danish Variety List.

Pedigree: [complex crossings]/Caracas/Labrador

Witt is best adapted to medium and early sowing dates. Witt is very easy to harvest almost like cereals.

Results from the Danish Official trials 2011 and Farmers Union Trials year 2012 and 2013:

	Gross output (yield adjusted for oil content) as % of control = Variety mixture			Oil content		
	2011	2012	2013	2011	2012	2013
Yield, 100 =	49.8 hkg/ha	52.7 hkg/ha	54.5 hkg/ha	%	%	%
Variety mixture*	100	100	100	47.8	49.6	49.5
Witt [L]	95	95	100	48.5	49.1	48.6
Sesame [L]	107	98	106	47.5	50.0	50.1
Noblesse [L]	106	96	101	48.6	50.6	50.4
